

**The Healthcare-associated
infection prevention tool a.k.a.
The CeHis Infection Tool**

Mikael Hoffmann, The NEPI foundation

PREVENTION

KNOWLEDGE SUPPORT

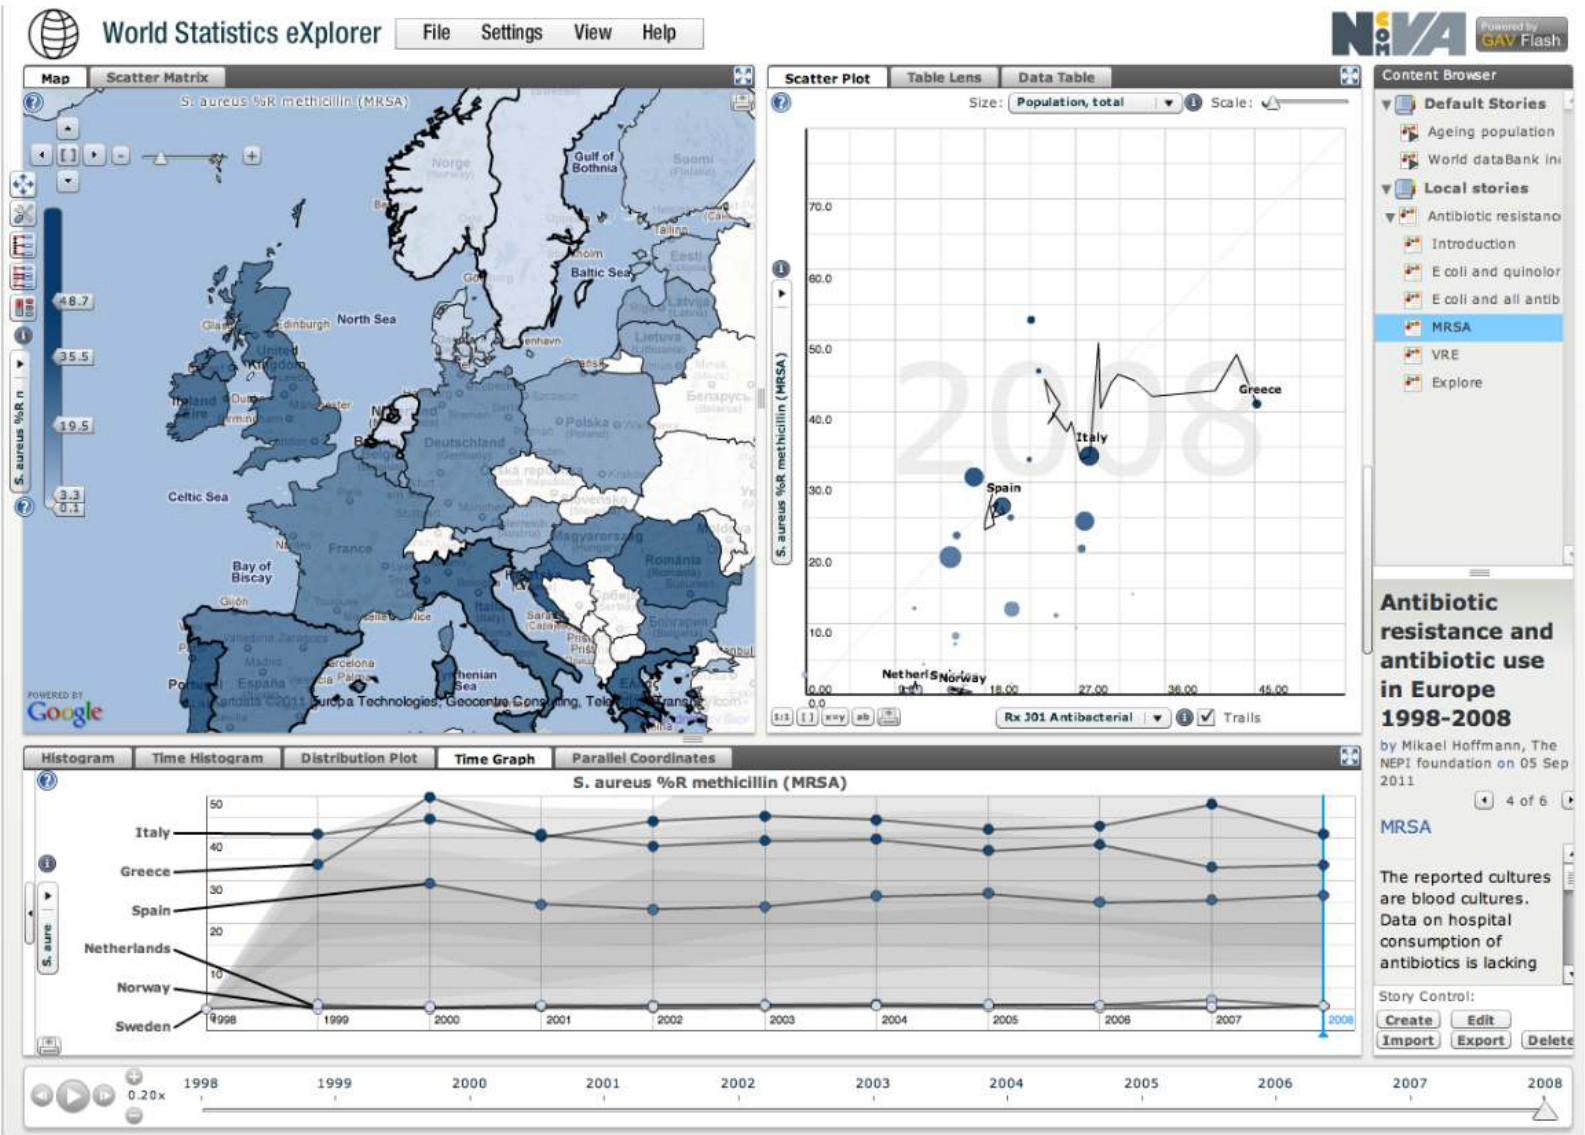

ANTI-RESISTANCE

A nationwide
mandatory support tool

EMR - 100 % coverage

- Low antibiotic use
- Low antibiotic resistance

HAI:s are a huge problem

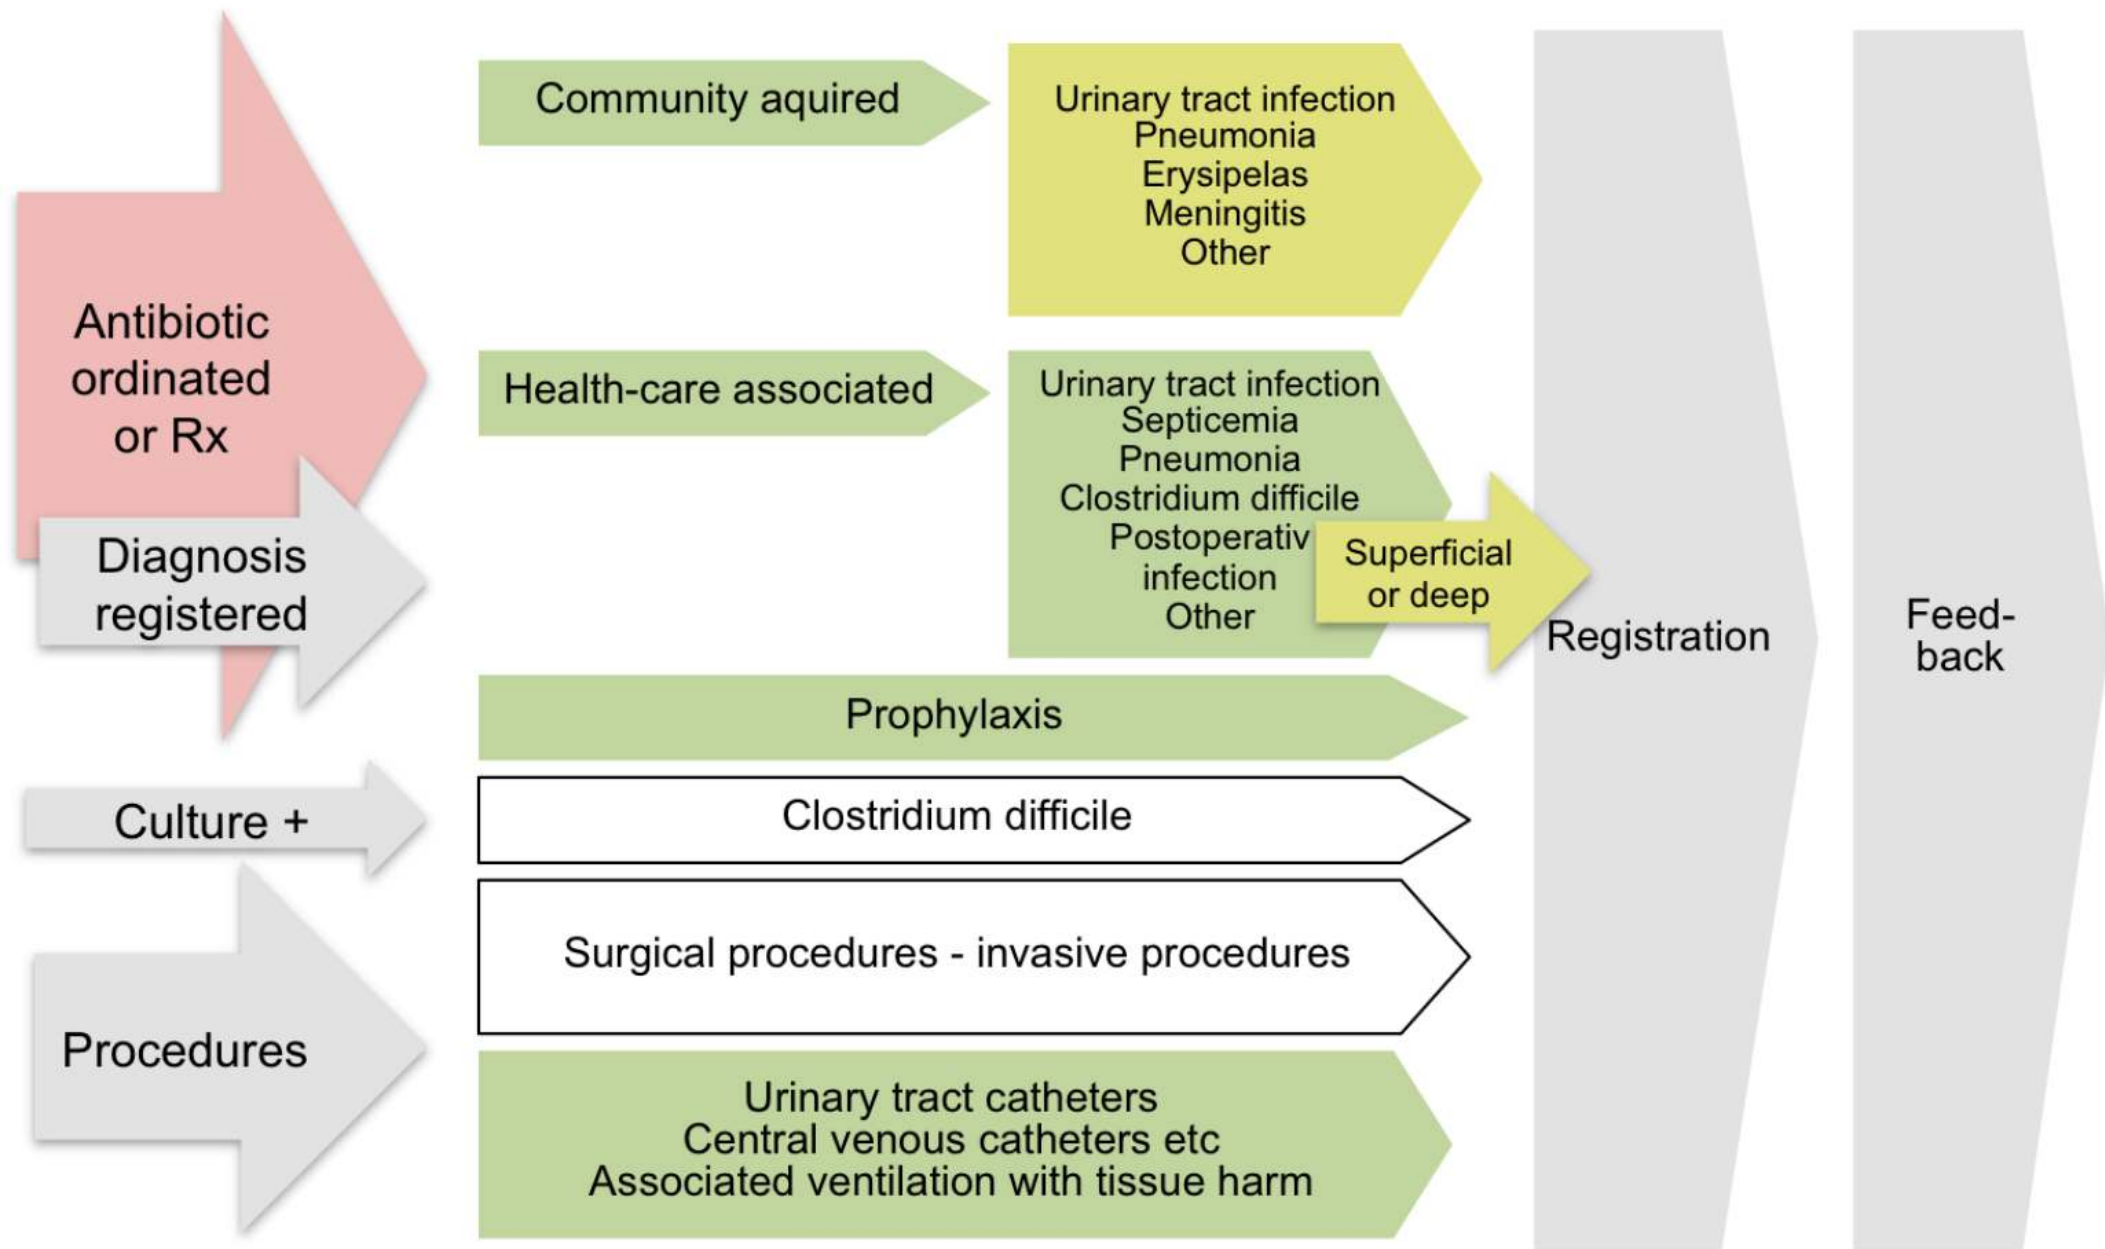

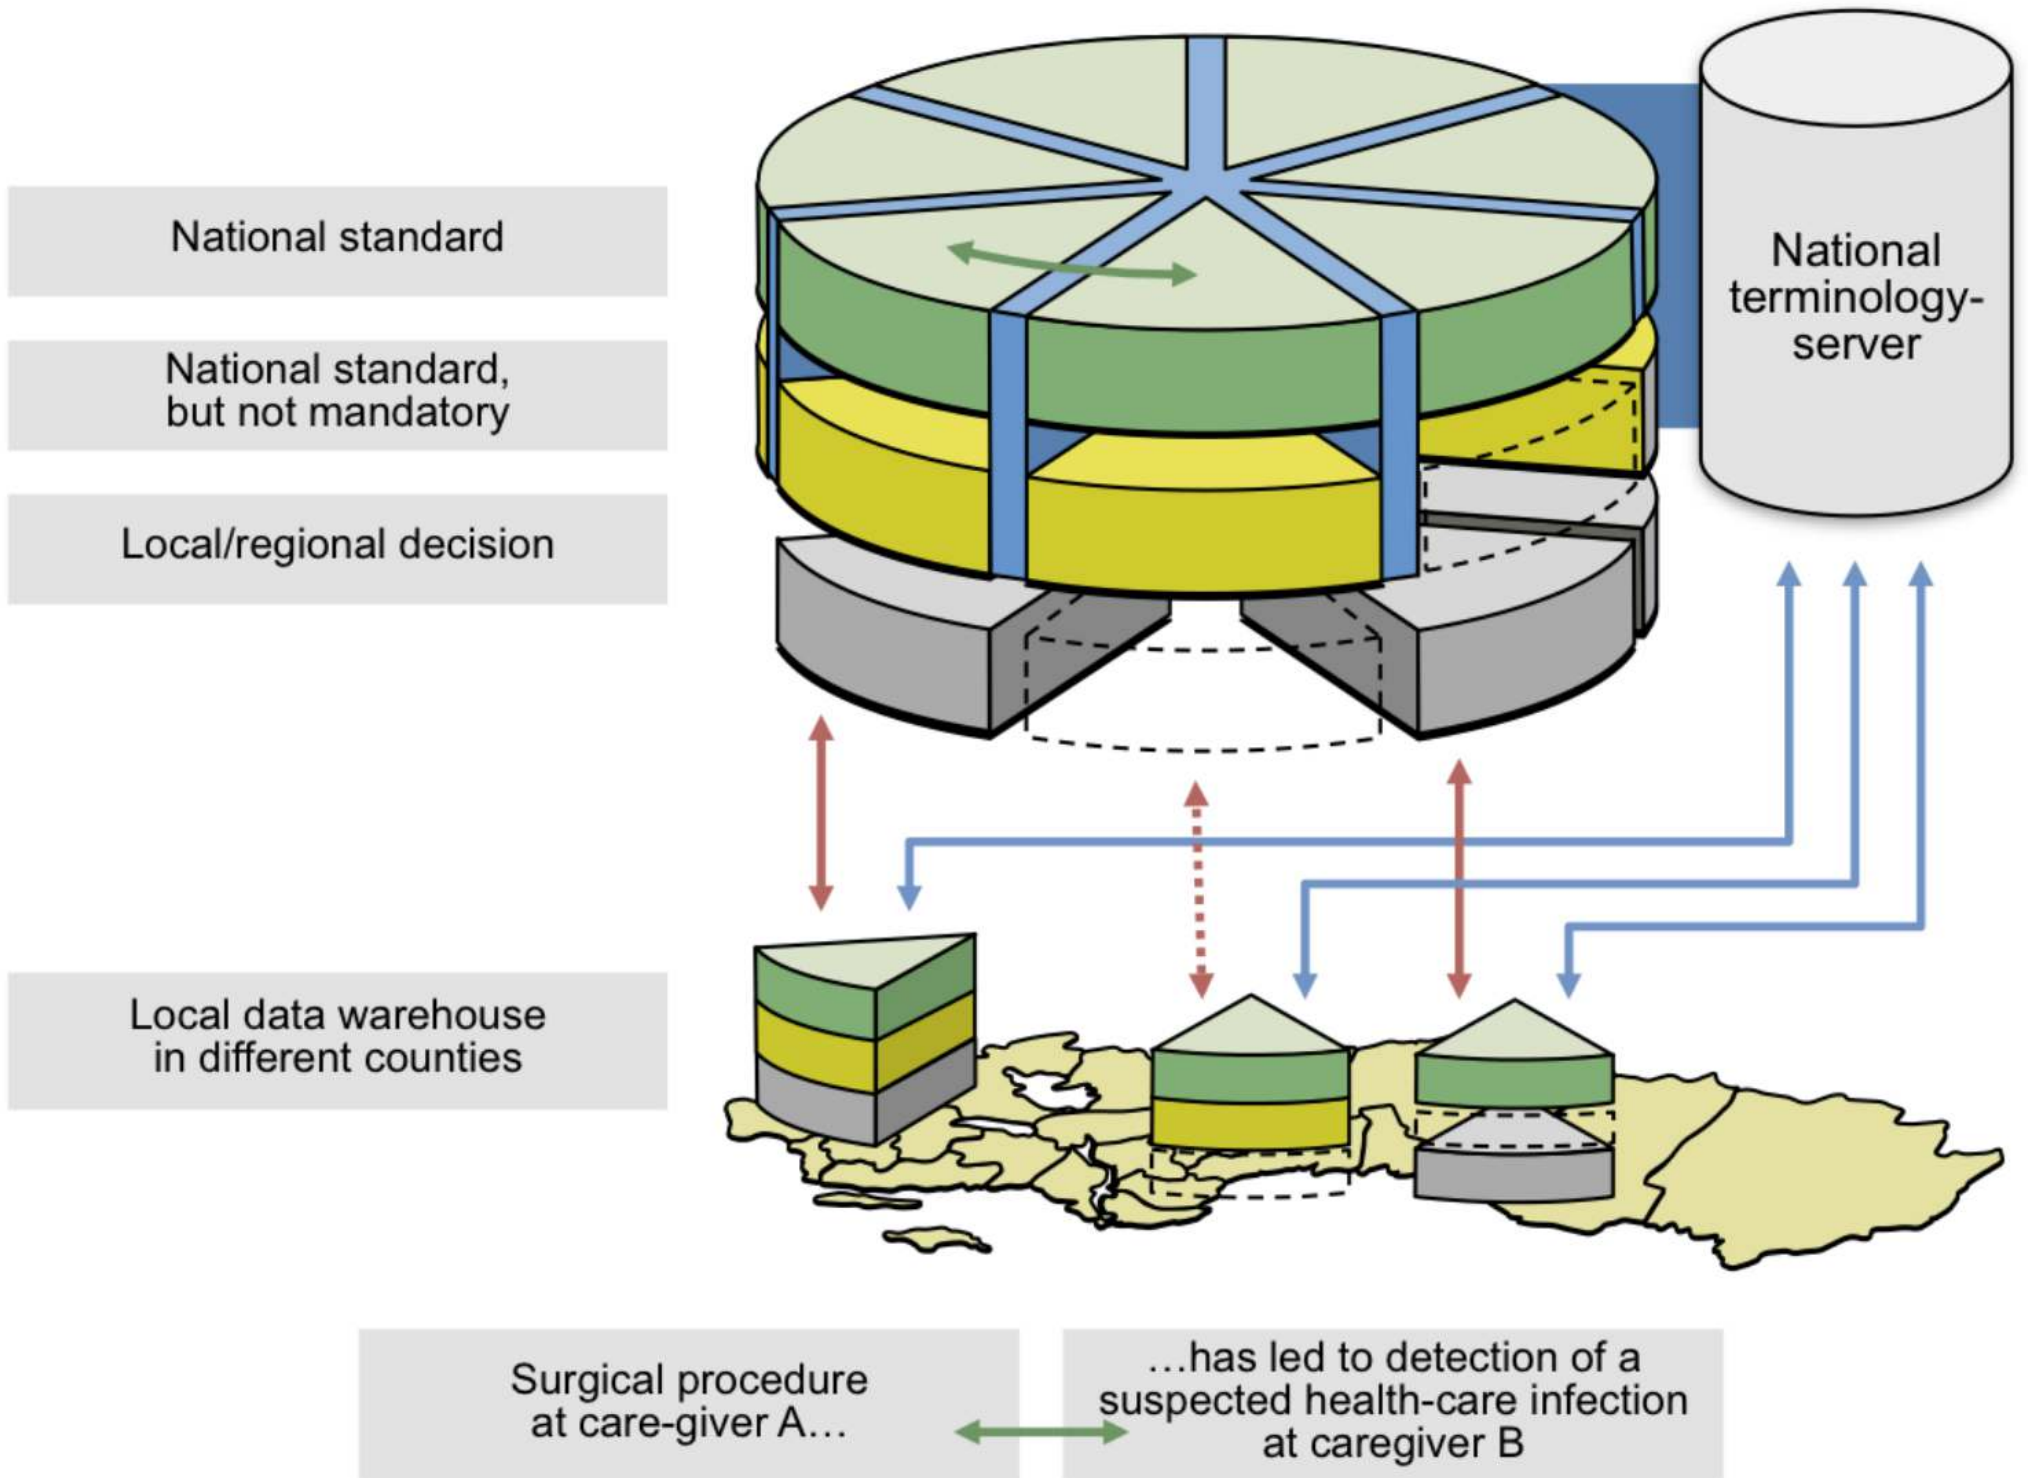

Even with

- low antibiotic use
- low antibiotic resistance
- low level of HAI:s

the problem is still large enough to warrant a concerted action on the national level!

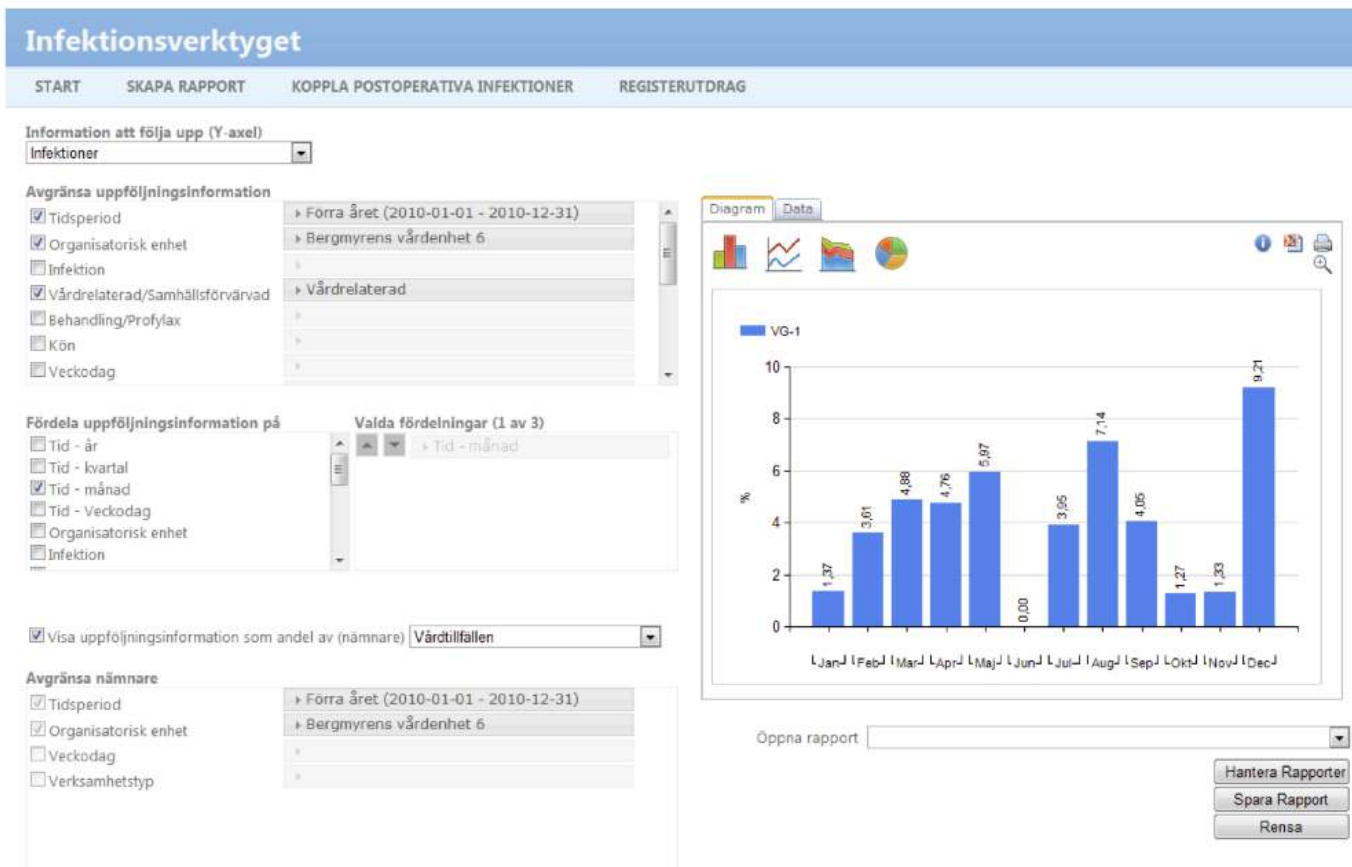

National data warehouse

Treat healthcare professionals
with respect - but demand
responsibility and provide
time & tools for improvement

- A tool for the healthcare professionals for over-night feed-back on performance and quality!
- A tool for surveillance of HAI and antibiotic use.
- NOT a tool for surveillance of healthcare professionals ...

You can't jump into
tomorrow until you have
gone through
TODAY.
You can't go back to
yesterday
because the door to the past
is closed and locked.

Part of the national eHealth-strategy

Pilot

- 2 out of 21 counties
- 2 out of 4 major EMRs
- Support from the Swedish Medical Association

Roll-out

- 2011-2012
- Incentive structure

- Incitament structure

Take home message?

Even with

- low antibiotic use
- low antibiotic resistance
- low level of HAIs

the problem is still large enough to warrant a concerted action on the national level!
